Siluveru Srinivas

Phone: **+91 6303272752** E-mail: siluverusrinivas0105@gmail.com

OBJECTIVE

- Apply analytical problem-solving and technical skills to achieve business goals.

PROFESSIONAL SUMMARY

- **3+ years of experience** developing responsive and scalable web applications using **ReactJS**, **Next.js, JavaScript (ES6+), TypeScript**, **HTML5**, **CSS3**, **Python**, and **Django.**
- **1+ year of experience** working as a **Full Stack Developer** building frontend with **React/Next.js** and backend APIs using **Django and Python.**
- Strong experience with **React Hooks** including **useState**, **useEffect**, **useMemo** and **useCallback** for state and lifecycle management.
- Hands-on experience with **React Router DOM** for routing, navigation, and protected routes.
- Hands-on experience developing and integrating **REST APIs** using **Django**, handling authentication and data processing.
- Experienced in implementing **JWT-based authentication** and **authorization** with secure session handling.
- Proficient with **Redux Toolkit** and **Context API** for predictable and optimized state management.
- Strong experience in responsive UI design using **Material UI (MUI)** and **Tailwind CSS**, ensuring cross-browser compatibility.
- Experience working with **AWS** services such as **S3**, **EC2**, **IAM**, and **Amplify** for deployment and storage.
- Familiar with unit testing using **Jest** and **React Testing Library (RTL).**
- Strong debugging and performance optimization skills including **lazy loading**, **memoization**, **debouncing,** and **code splitting.**
- Experienced working in **Agile teams** using **Git**, **GitHub**, **Jira**, **Postman**, and **Figma**.
- Hands-on experience using **AI developer tools (Claude, GitHub Copilot)** for code generation, debugging, documentation, and improving development efficiency over the last **6 months**.

EXPERIENCE SUMMARY

- Working as a **Software Engineer** at **Tweak Analytics Private Limited** from **January 2023 to Present**.

EDUCATION

- **Bachelor of Technology(ECE)** from **JNTU-H**, GPA:**6.54**
- **Intermediate(MPC)** from **TS Model Junior College**, **82**%
- **10th Standard** from **Noble High School**, **8.5** GPA

TECHNICAL SKILLS

Programming Languages	:	JavaScript, TypeScript, Python
Web Technologies	:	ReactJS, HTML, CSS, Material UI and Tailwind CSS
Tools & Technologies	:	Jira, GitHub, Postman, Figma
Version Control	:	Git
IDEs	:	Visual Studio Code, Pycharm
Cloud	:	S3, EC2, IAM, Amplify
Databases	:	MySQL, PostgreSQL
Frameworks	:	Next.js, Django

PROJECT DETAILS

Project #3

Name	:	Emisthra CBAM Certification
Client	:	Emisthra
Technologies	:	Next.js, TypeScript, Python, Django, REST APIs
Role	:	Full Stack Developer
Duration	:	Dec 2024 - Present

Description: Developed a comprehensive full-stack web application for emissions tracking and reporting for EU's Carbon Border Adjustment Mechanism (CBAM) compliance. The platform enables organizations to manage facilities, track product emissions, submit declarations, and generate regulatory reports. Built the frontend using Next.js, TypeScript and Redux Toolkit and contributed to backend development using Python and Django REST APIs for emission calculation and data processing workflows. Implemented role-based access control, Excel file uploads, multi-step wizards for emission calculation. Integrated internationalization (i18n) supporting 7 languages and designed a responsive UI with real-time validation and dynamic form generation

Responsibilities:

- Analyzed project requirements and designed user interfaces following UX best practices
- Developed reusable Next.js components and dynamic forms to improve development efficiency and maintainability
- Integrated frontend with backend REST APIs using Axios and handled API error management and response validation.
- Developed and enhanced backend APIs using Python and Django for emission calculation and reporting workflows.
- Implemented secure authentication and secure data handling using JWT-based authorization.
- Collaborated with the team using Jira for task tracking and GitHub for version control

Project #2

Name	:	Subscription Management
Client	:	Netesenz Inc.
Technologies	:	React.js and REST API Integration
Role	:	Front-End Developer
Duration	:	Sep 2023 - Nov 2024

Description: Subscription Management App is a comprehensive web platform that allows users to manage and subscribe to multiple streaming services like Netflix, Amazon Prime, and Disney+, as well as recharge mobile plans and pay prepaid bills such as Wi-Fi and DTH. Developed using React.js, the application offers a responsive, secure, and intuitive user experience across all devices. Users can register, log in, explore available plans, and complete secure transaction with ease The system integrates JWT-based authentication, protected routes, and dynamic plan rendering to maintain security and reliability

Responsibilities:

- Analyzed project requirements and designed user-friendly screens aligned with modern UX principles using React.js and Material UI.
- Integrated REST APIs for subscription plans, authentication, and payment workflows.
- Developed interactive and dynamic features like horizontal scrolling, accordions, and responsive layouts to enhance user experience
- Collaborated with the backend developers to debug, test and refine API integration for smooth data flow
- Maintained a clean, modular, and scalable codebase with reusable components.

Project #1

Name	:	Noni Digital Estates
Client	:	Noni Digital
Technologies	:	ReactJS and REST API Integration
Role	:	Front End Developer
Duration	:	JAN 2023 - Aug 2023

Description: Developed the Noni Digital Estates management platform that allows users to securely manage their online accounts, digital files, passwords, and other digital assets. Built dynamic and reusable React components for asset management, fiduciary assignment, and instruction configuration. Integrated frontend with backend APIs to fetch and update user data ensured a responsive layout, handled bug fixes and UI optimizations and collaborated with the team using Git for version control to deliver a stable and scalable application
